The 20th anniversary release of QS World University Rankings

Sustainability

A recurring call from experts in the field, not to mention our Advisory Board, has been to find a way of integrating our evaluation of sustainability into our flagship rankings

Employment Outcomes

To remain competitive in the market, institutions should prepare their graduates for the world of employment, as “the higher education sector is facing increasing demands for graduates to transition more effectively from education to work” *

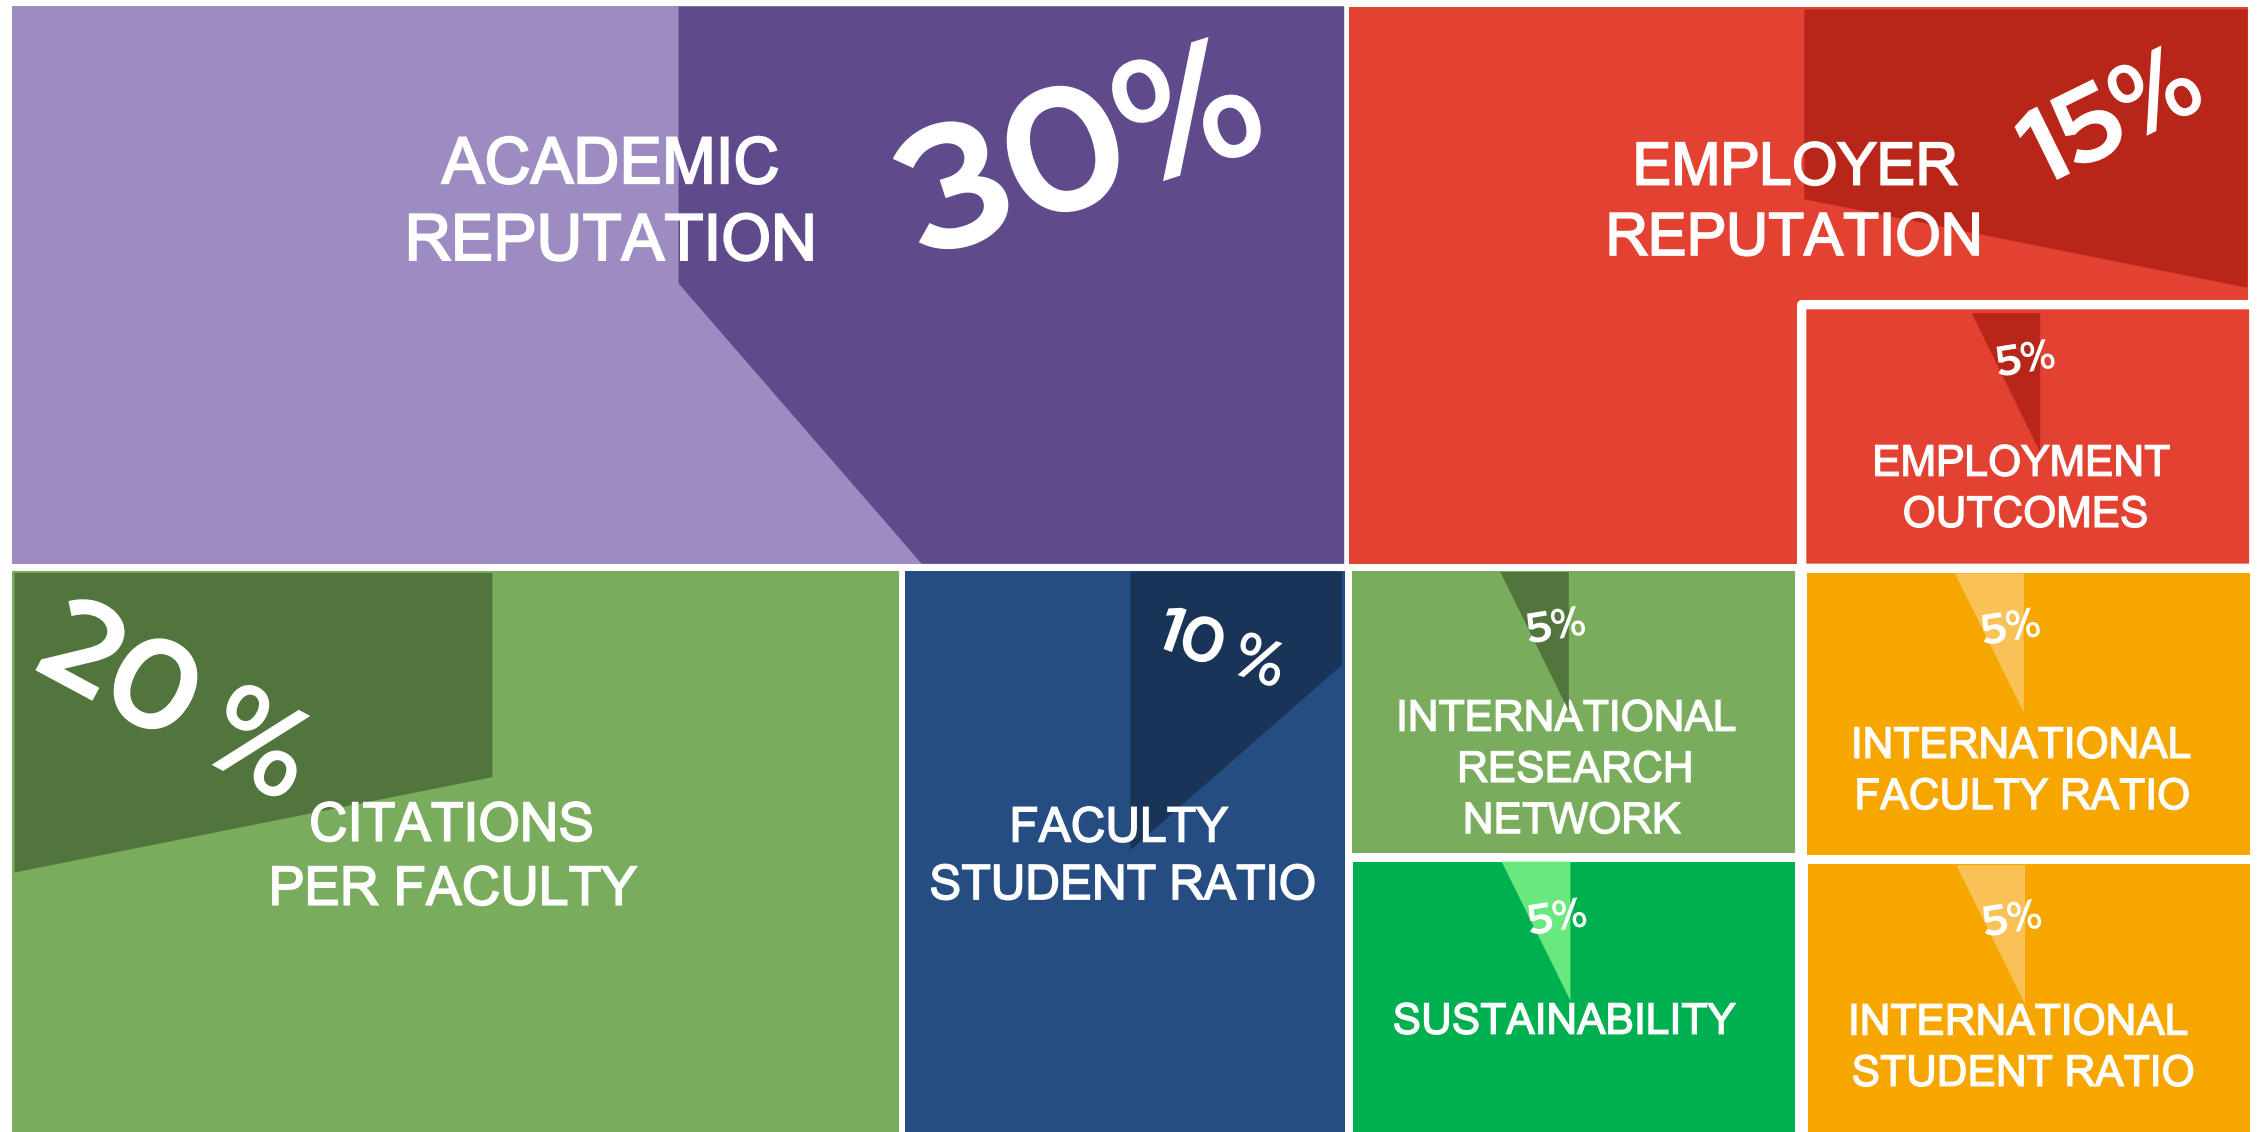

International Research Collaborations

Research collaboration is important for both universities and global knowledge-intensive communities as the challenges facing the world will be more easily solved when universities work across borders and cultures
